

REMARKS

Entry of this Preliminary Amendment to clarify and correct the specification and claims is respectfully requested.

The amendments to the specification corrects numeral and language errors, and on page 12, in the paragraph beginning on line 17, a clarification of the circuit board as being maintained stationary is provided, and this is supported in original claim 4, wherein the method claim indicates one of the steps as being "maintaining the circuit board stationary while at least one supply roll moves around the circuit board".

This provides support for stating that the circuit board is maintained stationary while the supply roll moves (rotates) around the circuit board. It is shown that the movement of the supply roll is rotational. The drawings illustrate that the center pin or pilot shaft 88 will move with the roll 50 and thus, it moves relative to the circuit board which is maintained stationary. The shaft 72 is described as being stationary, and sliding shaft 84 is inside the shaft 72 so that both of these shafts contact the end of the stationary circuit board. Thus, no new matter is introduced.

The changes to the claims are for antecedent and language basis, and it is believed to be merely clarifying rather than relating to patentability.

Entry of the Amendment is respectfully requested.

The Director is authorized to charge any fee deficiency required by this paper or credit any overpayment to deposit account No. 23-1123.

Respectfully submitted,

WESTMAN, CHAMPLIN & KELLY, P.A.
